A. Mohammed Asbar

SOFTWARE DEVELOPER & AI ENTHUSIAST

B.Tech — Artificial Intelligence & Data Science · Hindusthan Institute of Technology, India

I am genuinely excited about the opportunity to study in Italy — a country I admire not only for its rich academic tradition but also for its forward-thinking approach to technology and innovation. Studying at an Italian university would allow me to **merge my passion for Artificial Intelligence and software engineering** with an international perspective that I deeply value. I am the kind of learner who does not stop at theory — I build things, break them, and rebuild them better. Every project I have shipped is proof of that mindset.

ABOUT ME

I'm a 4th-year B.Tech student specialising in **Artificial Intelligence & Data Science**, and honestly, I love what I do. Over the past two years I have gone from writing my first Python script to deploying full-stack applications and live ML models that real people use. My work spans healthcare AI, urban traffic management, enterprise software, and e-commerce — not because I had to, but because I was genuinely curious about each of those problems.

I believe the best software is **built with empathy**: for the user, for the team, and for the problem. That belief shows in how I write code — clean, documented, and tested. I am comfortable working across the stack and I pick up new tools quickly, which I think is more valuable than knowing any single technology perfectly.

SELECTED PROJECTS

- Multiple Disease Prediction System** ML / HEALTHCARE AI [Live](#)

PythonStreamlitScikit-LearnPandas

 - Built an AI-powered web application that predicts Diabetes, Heart Disease, and Parkinson's Disease from clinical inputs using trained ML classifiers — deployed and accessible publicly.
 - Designed an intuitive UI that makes complex ML outputs understandable to non-technical users including patients and healthcare workers.
- Breast Cancer Predictor** ML / DATA SCIENCE [Live](#)

PythonScikit-LearnPlotlyStreamlit

 - Trained a classification model on the Wisconsin Diagnostic dataset to predict malignancy of cell clusters with radar chart visualisations for interpretability.
 - Added probability scoring so medical professionals can see confidence levels alongside predictions — not just a yes/no answer.
- EduCore — Centralized Learning Platform** FULL STACK [Live](#)

PythonFlaskREST APIRender

- Python for Data Science (2025)
- SQL & Database Management (2025)

INTERESTS

- AI / ML Research
- Open Source
- Cloud Tech
- Healthcare AI

- Designed and developed a full-stack academic platform with role-based portals for students, faculty, and administrators, including AI-powered study insights.
- Implemented course management, live attendance tracking, assignment submission, grade reports, and interactive dashboards.

Ashes2.0 Catalog — Tech Product Catalog

FRONTEND / REACT ↗ Live

- React
- Vite
- React Router
- CSS
- Built a premium multi-page tech product catalog with category browsing, advanced filters (price, rating), wishlist, compare, and light/dark mode.
- Integrated Google Sign-In and an admin management panel with clean, responsive UI.

Enterprise Employee Management System

FULL STACK ↗ Live

- React
- Node.js
- Express
- WebRTC
- Built an enterprise HR platform featuring EmpBot (AI assistant), WebRTC video calling, automated payroll generation, and Excel-based reporting.

EDUCATION

B.Tech — Artificial Intelligence & Data Science

2023 - 2027

Hindusthan Institute of Technology, Coimbatore, India
Currently in 4th Year (Final Year) · 2023 – 2027

COMMUNITY & ACTIVITIES

Attended the **Cloud Feast Community Meetup (2025)**, a gathering of industry professionals and cloud engineers where I networked, discussed cloud-native architectures, DevOps pipelines, and the future of cloud infrastructure. Events like this remind me how important it is to stay connected to the broader tech community beyond university assignments.

DECLARATION

I hereby declare that all the information furnished above is true and correct to the best of my knowledge and belief. I take full responsibility for the accuracy of the details provided in this resume.
